

S.M. MAHEDI HASAN

Full-Stack Developer | ReactJS · PHP · MySQL

Dhaka, Bangladesh | +880 1839-503782 | mahedi.freelancer@gmail.com
linkedin.com/in/iammahedi

PROFESSIONAL SUMMARY

Full-Stack Developer with 10+ years building scalable, user-focused web applications, including 1-2 years of hands-on ReactJS development on client projects. Strong command of PHP, MySQL, HTML5, and CSS3, with a proven record delivering responsive front-end and back-end features, optimizing databases, and integrating RESTful APIs and third-party services. Comfortable in Agile teams — sprint planning, standups, and code reviews — with a consistent focus on clean, reusable code, application security, and clear technical documentation.

TECHNICAL SKILLS

Front-End: ReactJS, JavaScript, jQuery, HTML5, CSS3, Responsive Design

Back-End: PHP, MySQL Database Design & Optimization, RESTful API Development & Integration

CMS & Platforms: WordPress (Theme & Plugin Development), HubSpot CMS, Webflow, Elementor, Divi, WPBakery

Practices & Tools: Git, Agile/Scrum (Sprint Planning, Standups), Code Reviews, Jira, Monday.com, Technical Documentation

Security & Performance: Application Security & Data Protection Best Practices, Caching, Image Compression, Code Minification, SEO & Accessibility

PROFESSIONAL EXPERIENCE

Web Developer (Freelance) | Upwork — Remote Jun 2013 – Present

- Built and maintained responsive front-end interfaces using ReactJS for client projects, integrating with PHP back-ends, MySQL-backed data layers, and RESTful APIs.
- Delivered 50+ web development projects for international clients across e-commerce, corporate, and nonprofit sectors — including fmcgroupglobal.com, confidencebd.com, phoenixgroupbd.com, and drishtyctg.org — managing scope, build, testing, and deployment independently.
- Wrote clean, reusable code, debugged cross-platform issues, and maintained technical documentation for ongoing client handoffs.

Full Stack Developer | Get Levrq — Dhaka, Bangladesh (On-site) Apr 2025 – Mar 2026

- Developed and optimized front-end and back-end features for responsive, client-facing websites using PHP, JavaScript, HTML, and CSS alongside WordPress and HubSpot CMS.
- Built custom themes, plugins, and backend functionality; integrated third-party platforms, APIs, CRM systems, forms, and payment gateways.
- Managed MySQL-backed databases behind custom WordPress and CMS builds, optimizing queries and structure for performance.
- Collaborated with designers, project managers, and QA throughout the project lifecycle, participating in Agile ceremonies including sprint planning and standups via Jira and Monday.com.
- Contributed to code reviews and best-practice standards; handled troubleshooting, debugging, and technical maintenance across staging and production environments.
- Improved application performance, responsiveness, SEO, and accessibility across client portfolios.

Specialist (Project Manager) | Get Levrq — Dhaka, Bangladesh (Hybrid) Mar 2026 – Present

- Maintain hands-on technical oversight of CMS implementations, migrations, and integrations while managing delivery across multiple client accounts.
- Translate client and stakeholder requirements into actionable engineering tasks, bridging technical and non-technical teams.

Executive, Information Technology | *FMC Group of Companies — Chittagong, Bangladesh Jan 2019 – Jan 2023*

- Designed and developed WordPress themes from scratch and customized existing themes to meet business and brand requirements.
- Built and integrated custom plugins to extend site functionality, working directly with the underlying MySQL database layer.
- Enforced application security and data-protection best practices through regular core, theme, and plugin updates.
- Optimized application performance through caching strategies, image compression, and code minification.
- Led a major version upgrade of core software and website infrastructure, improving speed and user experience.

Web Developer | *Whiz Communications — Chittagong, Bangladesh 2017 – 2019*

- Designed, developed, and updated client websites according to project requirements and specifications.
- Led planning and execution of web development projects, defining technical requirements and coordinating tasks among team members.
- Troubleshoot and resolved complex technical issues across existing systems and codebases.

Software Developer (Part-time) | *FMC Group Ltd — Chittagong, Bangladesh Jun 2016 – Dec 2019*

- Wrote efficient, maintainable code and built websites following standard HTML/CSS development practices.
